

## Mandatory Data Section

**Bold type below indicates that the element may include data originating from NCEI's NCEI SURFACE HOURLY/ASOS/AWOS or from AFCCC's USAF SURFACE HOURLY. Otherwise, data originated from USAF SURFACE HOURLY.**

**Note:** For the quality code fields with each data element, the following may appear in data which were processed through NCEI's Interactive QC system (manual interaction), for selected parameters:

- A – Data value flagged as suspect, but accepted as good value.
- U – Data value replaced with edited value.
- P – Data value not originally flagged as suspect, but replaced by validator.
- I – Data value not originally in data, but inserted by validator.
- M – Manual change made to value based on information provided by NWS or FAA.
- C – Temperature and dew point received from Automated Weather Observing Systems (AWOS) are reported in whole degrees Celsius. Automated QC flags these values, but they are accepted as valid.
- R – Data value replaced with value computed by NCEI software.
